

Disabling Defender's Controlled Folder Access

To access Defender's settings, click the Windows button and type **Defender**.

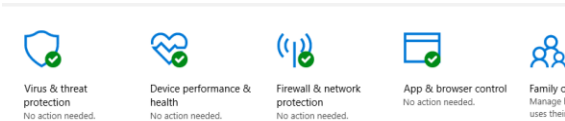

Click on **Windows Defender Settings**.

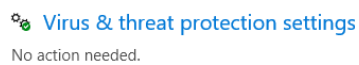

You may have to click on **Windows Defender** from here:

Click **Open Windows Defender Security Settings**

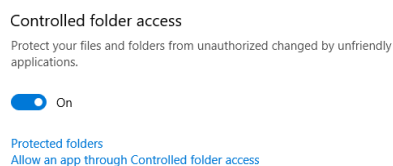

Click on **Virus and Threat protection**

Click on **Virus & threat protection settings**

Scroll down to **Controlled Folder Access**

Click the On switch to turn it off, and respond **Yes** to allow it to make the changes.
