

Changing a patient's diagnosis

This document shows you how to change the patient's diagnosis and then update a GNT document.

Step 1: Click the Patient Tab in the top left of GNT home screen.

Step 2: Select the patient you wish to change in the pick list on the left side of the window.

Step 3: Enter the new diagnosis in the appropriate section of primary, secondary, or tertiary. To do this, click the ... button next to the diagnosis.

The screenshot shows a software interface with a menu bar (File, Tools, More Tools, Help) and a toolbar (Patients, Add Sessions, Display, Edit, Print, Discharge, GNT Messages, Synchronize). A dropdown menu shows 'Practice Facility'. Below is a table of patients:

PID	First name	Last name	Status	Comments
26	Brooke	Practice	Active	
31	Dean	Practice	Active	
96	Frank	Practice	Active	
94	Heather	Practice	Suspended	Suspended
39	Jeff	Practice	Active	
71	Kathleen T	Practice	Active	
77	Loraine	Practice	Active	
95	Maddie	Practice	Active	
76	Miles T	Practice	Active	
79	Milton	Practice	Active	
30	Nicole	Practice	Active	
86	Presley	Practice	Active	
102	Priscilla	Practice	Active	
40	Sarah	Practice	Active	

Below the table are buttons for 'Roster by Name', 'Sessions remaining', 'Patient Documents', 'Set Patient to Suspended', and 'History'. The right side of the screen shows a patient form for Priscilla Practice. The 'Psychological Diagnoses' section is circled in red and contains:

- Primary: F33.1
- Secondary: F02.81
- Tertiary: (empty)

Other form fields include Location (Practice Facility), Room (250), Language (English), POS (Skilled Facility), Hospice (checked), Gender (Female), Race (Caucasian), and Weeks Between Visits (2). A 'Save Changes' button is at the bottom.

Step 4: Double click to enter the new diagnosis when you find it. You can use filters at the bottom to find what you are looking for faster. If you need to delete a diagnosis, scroll to the very top and double click on the blank line. Click OK and then Save Changes.

The screenshot shows the same patient management software interface. A dialog box titled 'Previous Dx=F33.1 - Major depressive disorder, recurrent, moderate' is open, displaying a list of diagnoses:

Diagnosis	Description
F33.1	Major depressive disorder, recurrent, moderate
F33.2	Major depressive disorder, recurrent severe without psychotic features
F33.3	Major depressive disorder, recurrent, severe with psychotic symptoms
F33.41	Major depressive disorder, recurrent, in partial remission
F33.42	Major depressive disorder, recurrent, in full remission
F33.8	Other recurrent depressive disorders
F33.9	Major depressive disorder, recurrent, unspecified
F34.0	Cyclothymic disorder
F34.1	Dysthymic disorder
F34.89	Other specified persistent mood disorders
F34.9	Persistent mood (affective) disorder, unspecified
F40.00	Agoraphobia, unspecified
F40.01	Agoraphobia with panic disorder
F40.02	Agoraphobia without panic disorder
F40.10	Social phobia, unspecified
F40.11	Social phobia, generalized
F40.210	Arachnophobia
F40.218	Other animal type phobia
F40.220	Fear of thunderstorms

At the bottom of the dialog box, there are search filters: 'Novitas only' (checked), 'Desc contains:', and 'Code contains:'. The 'OK' button is circled in red. Below the dialog box, the 'Save Changes' button on the main form is also circled in red.

Step 4: Click the **Save Changes** button. If you need the diagnosis to apply to past notes that have been written, follow this process. Find and open each note in question (Display, All for a Patient) and once the note is open, click Update Patient Info. This will bring over the changes. Be sure to jump to the end of the document and click COMPLETE AND SIGN again.
